

B.S. in Homeland Security and Intelligence

Students will:

- Interpret the legal and policy structure of the homeland security and intelligence enterprise.
- Evaluate emergency management policies and strategies, including emergent threats.
- Analyze terrorism, its origins, ideologies, and goals.
- Assess U.S. critical infrastructures using risk-based methodologies and resiliency concepts.
- Apply risk management and analysis principles to homeland security and intelligence issues.
- Compare concepts of human and environmental security as applied to homeland and intelligence.
- Analyze elements of strategic planning and decision making.
- Engage in all phases of the intelligence cycle, including techniques, strategies, and counter-intelligence concepts.
- Identify information security threats, cybersecurity challenges, and countermeasures.
