

B.S. in Aviation Maintenance Science to Master of Business Administration

This program allows the exceptional student to complete the Bachelor of Science in Aviation Maintenance Science (BSAMS) and Master of Business Administration (MBA) degrees.

Upon completing the BSAMS requirements, the Bachelor of Science degree in Aviation Maintenance Science will be conferred, and students will be enrolled in the MBA degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. These credits will count toward the B.S. and MBA degree requirements, provided the student maintains enrollment in the combined program and receives a "B" or better in the courses.

If the student chooses to leave the program before the completion of the MBA program and has acquired the minimal hours required for graduation with the B.S. in Aviation Maintenance Science, any MBA transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Option

Students enrolled in the combined option must consult their academic advisor and the MBA program coordinator to determine appropriate course selection. Students may choose up to two courses (six hours) from BA 511, BA 520, or BA 523 to fulfill an equal number of upper-level open electives in the B.S. in Aviation Maintenance Science degree.

The Maintenance Management Area of Concentration must be selected as the field of study to prepare the student for this degree option. Students should review the undergraduate degree program sections for the recommended course of study and program requirements.
