

# B.S. in Aeronautical Science to Master of Business Administration - Aviation Management

---

This program allows the exceptional student to complete the Bachelor of Science in Aeronautical Science (BSAS) and Master of Business Administration in Aviation Management (MBA-AM) degrees.

Upon completing the BSAS requirements, the Bachelor of Science degree in Aeronautical Science will be conferred, and students will be enrolled in the MBA-AM degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. These credits will count toward the B.S. and MBA-AM degree requirements, provided the student maintains enrollment in the combined program and receives a "B" or better in the courses.

If the student chooses to leave the program before the completion of the MBA-AM program and has acquired the minimal hours required for graduation with the BS in Aeronautical Science, any MBA-AM transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

## Approved Courses for the Combined Option

Students enrolled in the combined option must consult their academic advisor and the MBA-AM program coordinator to determine appropriate course selection. Students will take BA 511, BA 514, and/or BA 520 to replace an equal number of Open Elective courses in the BSAS degree.
