

# B.S. in Aeronautics to M.S. in Aerospace Business Analytics

---

This program allows the exceptional student to complete the Bachelor of Science in Aeronautics (BSA) and Master of Science in Aerospace Business Analytics (MSAEBUAN) degrees.

Upon completing the BSA requirements, the Bachelor of Science degree in Aeronautics will be conferred, and students will be enrolled in the MSAEBUAN degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. These credits will count toward the B.S. and MSAEBUAN degree requirements, provided the student maintains enrollment in the combined program and receives a "B" or better in the courses.

If the student chooses to leave the program before the completion of the MSAEBUAN program and has acquired the minimal hours required for graduation with the B.S. in Aeronautics, any MSAEBUAN transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

## Approved Courses for the Combined Option

Students enrolled in the combined option must consult their academic advisor and the MSAEBUAN program coordinator to determine appropriate course selection. Students will take BA 511, BA 523, and/or BA 530 to replace an equal number of Professional Development and/or Open Elective courses in the BSA degree.
