

B.S. in Aviation Business Administration/M.S. in Aerospace Business Analytics

This program allows exceptional students to complete the Bachelor of Science in Aviation Business Administration (BSABA) and Master of Science in Aerospace Business Analytics (MSAEBUAN) degrees.

Upon completing the BSABA requirements, the Bachelor of Science degree in Aviation Business Administration will be conferred, and students will be enrolled in the MSAEBUAN degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. These credits will count toward the B.S. and MSAEBUAN degree requirements, provided the student maintains enrollment in the combined program and receives a "B" or better in the courses.

If the student chooses to leave the program before the completion of the MSAEBUAN program and has acquired the minimal hours required for graduation with the B.S. in Aviation Business Administration, any MSAEBUAN transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Option

Students enrolled in the combined option must consult their academic advisor and the MSAEBUAN program coordinator to determine appropriate course selection. Students will take BA 511, BA 523, and/or BA 530 to replace an equal number of Open Elective courses in the BSABA degree.
