

B.S. in Aerospace Physiology to Master of Business Administration in Aviation Management

This program allows the exceptional student to complete the Bachelor of Science in Aerospace Physiology (BSAP) and Master of Business Administration in Aviation Management (MBA-AM) degrees.

Upon completing the BSAP requirements, the Bachelor of Science degree in Aerospace Physiology will be conferred, and students will be enrolled in the MBA-AM degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. These credits will count toward the B.S. and MBA-AM degree requirements, provided the student maintains enrollment in the combined program and receives a "B" or better in the courses.

If the student chooses to leave the program before the completion of the MBA-AM program and has acquired the minimal hours required for graduation with the B.S. in Aerospace Physiology, any MBA-AM transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Option

Students enrolled in the combined option must consult their academic advisor and the MBA-AM program coordinator to determine appropriate course selection. Students will take BA 514, BA 520, and/or BA 523 to replace an equal number of Open Elective courses in the BSAP degree.
