

Dual M.S. in Aviation Finance and M.S. in Aerospace Business Analytics

For exceptional students enrolled in Master of Science in Aviation Finance or Master of Science in Aerospace Business Analytics, the David B. O'Maley College of Business offers the opportunity to simultaneously pursue a Master of Science in the other area (i.e. Master of Science in Aviation Finance (MSAF) or Master of Science in Aerospace Business Analytics (MSAEBUAN)).

With this option, the student will take a total of 33 credits to obtain a Master of Science in Aerospace Business Analytics and an additional 24 credits to obtain the Master of Science in Aviation Finance (or vice versa). Nine (9) credits from the one degree will count towards the other's total requirement of 33 credits. Bridge classes (BA 523, FIN 620 and/or 3 credit of electives - 9 credits) are proposed to replace these core/elective classes in the corresponding complimentary (MSAEBUAN/MSAF) program. The student must declare that they are interested in the combined degree at or before completing 15 credits in the first program.

Graduate students may apply to the Dual MSAF – MSAEBUAN option by submitting an application to the business Master's program coordinator. Students must have completed up to 15 credit hours toward the respective preliminary Master's degree and must have a 3.0 minimum GPA to be admitted to the dual degree program. Students will be dropped from the program if their GPA falls below 3.0.
