Courses

ASC 101 Aeronautical Science Student Success Seminar 1 Credit (1,0)

This course helps students assess and develop the personal, interpersonal, intellectual, and social skills necessary to succeed in a flight-related college degree program. Topics include time management, study skills, principles of learning, goal clarification, and college resources. Practical applications will emphasize strategies for coping with challenges unique to students in a flight-related degree program. Students must register for the same section of AS 121 and ASC 101.

Corequisites: AS 121
