# M.S. in Aviation and M.S. in Aviation Finance

## Daytona Beach Program Requirements

For exceptional students enrolled in the Master of Science in Aviation program, the David B. O'Maley College of Business and the College of Aviation offer the opportunity to simultaneously pursue a Master of Science in Aviation Finance and a Master of Science in Aviation.

With this option, the student will take a total of 33 credits to obtain a Master of Science in Aviation (MSAV) and an additional 24 credits to obtain the Master of Science in Aviation Finance degree (MSAF). Nine (9) credits from the MSAV degree will count towards the MSAF's total requirement of 33 credits. Bridge classes (ASCI 604 / MSAV 554 and MSAV 662 and MSAV 670 ) will replace elective classes in the MSAF program. The student must declare their interest in the combined degree at or before completing 15 credits in the MSAV program.

Graduate students may apply to the Dual MSAV-MSAF option by submitting an application to the business Master's program coordinator. Students must have completed up to 15 credit hours toward the respective MSAV degree and must have a 3.0 minimum GPA to be admitted to the dual degree program. Students will be dropped from the program if their GPA falls below 3.0.
