

Graduate Certificate in Advanced Airline Management

The Advanced Airline Management graduate certificate provides an overview of advanced concepts in airline operations and management. The program examines strategic, operational and organizational aspects of the airline industry, supporting the application of management principles within aviation contexts.

Note: Certificate programs are not eligible for Title IV Federal Financial Aid unless taken as part of a degree program.

Program-Level Student Learning Outcomes

Students will:

- Apply advanced operational, financial, and strategic principles to optimize airline performance and profitability.
- Evaluate sustainability and resilience considerations to ensure long-term viability and compliance in airline operations.
- Apply analytical and managerial skills to make data-driven decisions that enhance efficiency, safety, and customer experience in the airline industry.
