

Graduate Certificate in Advanced Airport Management

The Advanced Airport Management graduate certificate provides an overview of advanced concepts in airport operations and management. The program examines strategic, operational and organizational aspects of airport systems, supporting the application of management principles within aviation contexts.

Note: Certificate programs are not eligible for Title IV Federal Financial Aid unless taken as part of a degree program.

Program-Level Student Learning Outcomes

Students will:

- Apply advanced principles of airport operations, planning, and financial management to real-world aviation environments
- Evaluate sustainability and resilience challenges in airport management
- Demonstrate decision-making and problem-solving skills to enhance airport efficiency, safety, and customer experience
