

Graduate Certificate in Agile Project Management

The Agile Project Management graduate certificate provides an overview of agile principles and practices in project management. The program examines iterative development approaches, team collaboration and adaptive planning within project environments, supporting the application of agile methodologies across a range of organizational contexts.

Note: Certificate programs are not eligible for Title IV Federal Financial Aid unless taken as part of a degree program.

Program-Level Student Learning Outcomes

Students will:

- Perform generally accepted agile project management techniques to execute projects.
- Apply analytical tools for effective agile project decision-making.
- Apply communications skills within the agile project team environment.
- Analyze agile project metrics for the purpose of reporting and controlling projects.
