

Graduate Certificate in Systems Engineering

The online Graduate Certificate in Systems Engineering is designed for students pursuing education in the systems engineering field. In this program, students will gain the skills to apply systems thinking to engineering and operational challenges, use tools to manage systems throughout their lifecycle, interpret stakeholder requirements for analysis and design, and apply quantitative analysis techniques to solve complex engineering problems.

The Systems Engineering certification is available exclusively to students enrolled in the Master of Science in Engineering Management.

Note: Certificate programs are not eligible for Title IV Federal Financial Aid unless taken as part of a degree program.
