

Master Business Administration in Aviation

This customizable MBAA allows students to tailor your educational experience through core courses and optional certificates. These certificates enable graduates to develop specialized skills to advance their careers in diverse professional environments.

The Worldwide Campus is designed for working professionals, allowing students to complete coursework online or in flexible formats while continuing their careers, which is ideal for those already in the aviation industry.

The Asia Campus exposes students to one of the fastest-growing aviation regions in the world, providing insight into international regulations, airline operations and business practices.

Both options also connect students with a diverse, global network of peers and professionals, which is important in an industry that operates around the world.

At the **Worldwide Campus**, the Master of Business Administration in Aviation is designed to prepare students for leadership roles through a curriculum that emphasizes marketing, finance, production strategy, and human resource operations. The program includes study of business practices and their application to the aviation industry. The program is offered in formats that accommodate working professionals and incorporates High-Reliability Organization (HRO) principles. Students may complete courses for certificate options as outlined in the Worldwide Catalog. The Master of Business Administration in Aviation is accredited by the Accreditation Council for Business Schools and Programs (ACBSP) and is recognized by the Royal Aeronautical Society (RAeS).

At the **Asia Campus**, the Master of Business Administration in Aviation focuses on a curriculum related to the aviation and aerospace sectors, with emphasis on marketing, finance, production, and strategy. The program is offered through Embry-Riddle's Asia Institute as a full-time program with options for Aviation Non-Certificate or other specialized certificates. A part-time program at the Singapore Aviation Academy includes additional certification options such as Airline Management, Business Intelligence, Finance, and Leadership. The program includes study of management and specialized areas within the aviation industry. The Master of Business Administration in Aviation is accredited by the Accreditation Council for Business Schools and Programs (ACBSP).
