

M.S. in Management Information Systems

At the **Worldwide Campus**, the Master of Science in Management Information Systems focuses on the intersection of information systems and business management. The program includes study of data organization, management, and the use of technology to support decision-making in organizations. The curriculum includes research components and aligns with standards associated with organizations such as the Association for Information Systems. The program addresses analysis of data, design of information systems, and the application of technology to problem-solving.
