

M.S. in Management

At the **Worldwide Campus**, the Master of Science in Management focuses on analytical skills and the evaluation of organizational problems to develop solutions. The program includes study of leadership, decision-making, and organizational management. The curriculum emphasizes management of high reliability organizations (HRO) and is taught by faculty with professional experience. The program includes development of critical-thinking, problem-solving, quantitative, communication, and global awareness skills. Areas of study include organizational behavior, decision-making, and strategy. The Master of Science in Management is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). The program requires 36 credit hours with a certificate option or 30 credit hours without a certificate.

The program does not require an undergraduate degree in business for admissions. However, as required by ACBSP, prerequisite knowledge in accounting, finance, economics, marketing, management, and business statistics is required. This will be accomplished through a short MSM Preflight Orientation Course that welcomes students to the degree program through interactive activities and provides the prerequisite knowledge needed to be successful in the program. Students must complete the Preflight Orientation prior to taking their first MSM course.
