

B.S. in Aviation Business Administration

The Bachelor of Science in Aviation Business Administration is offered at all Embry-Riddle Aeronautical University campuses, providing opportunities for full-time students, working professionals and anyone seeking a career in the field.

At the **Daytona Beach Campus**, the Bachelor of Science in Aviation Business Administration, housed in the David B. O'Maley College of Business, includes a blend of aviation-related science and general education courses, along with courses in airport management and aviation business principles. During the second year, students declare a major from the list below. Students enrolled in Air Force, Army, or Navy ROTC programs may substitute AF, MY, or NSC courses for open elective courses. The program includes the following areas of study: Airport Transportation, 21 credit hours with a focus on airline management and air transport economics; Aviation and Aerospace Marketing, 21 credit hours with a focus on consumer behavior and strategic marketing, with a management and social media focus; and Supply Chain Management in Aviation and Aerospace, 21 credit hours with a focus on global logistics, management, and consulting. The Aviation Business Administration program has dual accreditation through the Aviation Accreditation Board International (AABI) and the Accreditation Council for Business Schools and Programs (ACBSP).

At the **Prescott Campus**, the Bachelor of Science in Aviation Business Administration degree is housed in the School of Business in the College of Business, Security and Intelligence. The undergraduate Aviation Business Administration program emphasizes effective communication, quantitative skills, global awareness, teamwork, and business functional skills. The program is designed to provide a business foundation with preparation for management careers in the aerospace or aviation industry. The Aviation Business Administration program has dual accreditation through the Aviation Accreditation Board International (AABI) and the Accreditation Council for Business Schools and Programs (ACBSP).

At the **Worldwide Campus**, the Bachelor of Science in Aviation Business Administration is housed in the Department of Business Administration in the College of Business. The program is offered in an online format with multiple term start dates throughout the year. In the Bachelor of Science in Aviation Business Administration, students study core business professional skills in an aviation context and prepare for positions in aviation and other industries. The program includes faculty with backgrounds in business, aviation, aerospace, and the military. The BSABA is structured as an aviation management degree; however, additional topics may be studied by pursuing a major or adding a minor. Students may pursue a major in Aviation Marketing, consisting of 27 credit hours with a focus on consumer behavior, public relations, and strategic marketing, including management and social media. The Aviation Business Administration program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

At the **Asia Campus**, a degree in Aviation Business Administration prepares students for careers in the aviation and aerospace industries. Growth in air travel demand, influenced by economic conditions, emerging markets and societal changes, contributes to a need for professionals across multiple sectors. Students in Aviation Business Administration pursue careers in airlines, airports, maintenance, repair and overhaul (MRO), logistics companies and management roles in government and regulatory bodies. The Aviation Business Administration program is accredited by the Accreditation Council for Business Schools and Programs (ACBSP). Additional modules may be required based on placement examination results in mathematics and English.

Program-Level Student Learning Outcomes

Daytona Beach

Students will:

- Use research and data to develop reasoned, defensible solutions to aviation/aerospace business problems.
- Apply business and leadership principles to lead teams ethically and effectively across business functions.
- Analyze current societal trends and their impact on the aviation/aerospace industry.
- Prepare business communications to effectively engage diverse audiences.
- Demonstrate subject matter expertise in areas of aviation/aerospace as determined by AABI.
- Demonstrate foundational knowledge across core business disciplines.
- Analyze the business ethical environment and apply ethical reasoning.
- Analyze aviation-aerospace marketing practices using aviation and aerospace benchmarking methodologies.
- Recommend best practices to optimize the supply chain and add value to the organization.
- Analyze air transportation practices using aviation and aerospace benchmarking methodologies.

Prescott

Students will:

- Use research and data to develop reasoned, defensible solutions to aviation/aerospace business problems.
- Apply business and leadership principles to lead teams ethically and effectively across business functions.
- Analyze current societal trends and their impact on the aviation/aerospace industry.
- Prepare business communications to effectively engage diverse audiences.
- Apply core business knowledge through professional industry performance.

Worldwide & Asia

Students will:

- Use research and data to develop reasoned, defensible solutions to aviation/aerospace business problems.
- Apply business and leadership principles to lead teams ethically and effectively across business functions.
- Analyze current societal trends and their impact on the aviation/aerospace industry.
- Prepare business communications to effectively engage diverse audiences.
- Demonstrate proficiency in identifying and solving global problems related to aviation business administration specialties.

Program Details

The Bachelor of Science in Aviation Business Administration program requires successful completion of a minimum of 120 credit hours. The program may be completed in eight semesters, or four years, assuming appropriate background and full-time enrollment. Students pursuing this undergraduate degree must earn a minimum cumulative grade point average (CGPA) of 2.00 for all work completed at the University. The courses necessary to earn this degree are listed below.

Students should be aware that many courses have prerequisites and/or corequisites. Students are responsible for ensuring that all prerequisite and degree requirements are met prior to enrollment in advanced coursework.

Program Details

The Bachelor of Science in Aviation Business Administration at the Asia Campus requires successful completion of a minimum of 121 credit hours. Students should consult their advising report to determine which modules, if any, have been granted as exemptions. The courses required to earn this degree are listed below.

Students should be aware that many modules have prerequisites and/or corequisites. Students are responsible for ensuring that all prerequisite and degree requirements are satisfied prior to enrollment in advanced coursework. The suggested plan of study is provided as a guide. A student's actual plan of study may vary based on instructor availability, the number of modules taken during a term, and other academic considerations.

Based on placement examination results, students may be required to complete one or more of the following modules prior to beginning the program: COMM 104, COMM 106, MATH 100, and/or MATH 106. Students should consult with their academic advisor to develop an individualized plan of study.

Note: Asia campus students follow Worldwide prerequisite requirements unless otherwise specified.

* COIN 496 is a mandatory 3-credit course module intended for all undergraduate students to take as part of the Bachelor of Science in Aviation Business Administration offered through the Singapore location. Under certain extenuating circumstances, COIN 496 may be substituted on a case-by-case basis for SCLM 331 Transportation Principles in discussion with the Academic Advising Team. COIN 496 is an industry attachment serving as a structured supervised internship through which a student is personally coached by expert faculty. COIN 496 intends to add value to the student experience and benefit student employability upon completion of the degree program.
