

B.S. in Engineering Technology

Offered entirely online in the College of Aviation's School of Engineering, the Engineering Technology program prepares students to put their engineering skills to work in a variety of industries. This degree program allows students to participate in research projects, virtual labs, and a capstone course, ensuring they graduate with the fundamental skills needed to achieve their career aspirations.

This degree explores the topics most aligned with your goals and interests. Through cutting-edge virtual labs and simulation methods, students will develop the skills to design, refine, and apply engineering technologies across a range of industries. Students can choose to target their studies with a particular concentration, including Aeronautical Science, Aviation Safety, Helicopter Operations and Safety, Logistics Management, Management Information Systems, Occupational Safety and Health, Project Management, Security and Intelligence, and Uncrewed and Autonomous Systems.

The Bachelor of Science in Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org (<http://www.abet.org/>), under the commission's General Criteria with no applicable program criteria.
