

B.S. in Interdisciplinary Studies

The B.S. in Interdisciplinary Studies at the **Daytona Beach Campus** prepares graduates to become corporate leaders in a dynamic, global landscape. With a strong foundation in general education and interdisciplinary inquiry, the program offers students the flexibility to customize their degree. By focusing on the student's strengths and interests, students select three minors or two minors and an area of focus. Through a truly interdisciplinary core that integrates the humanities, technology, and sciences, students learn to think critically, connect ideas across disciplines, communicate effectively, and adapt to rapidly changing career environments, preparing them to become innovative leaders in their chosen fields.

At the **Worldwide Campus**, the B.S. in Interdisciplinary Studies provides students the opportunity to design a customized program that connects science, technology and humanity. Graduates can pursue careers in aviation, aerospace, international business, communication or related fields. Core courses focus on strengthening communication and analytical skills, while the interdisciplinary structure allows students to select a minor area of study that expands their knowledge and global perspective.

The program is part of the Air University-Associate to Baccalaureate Cooperative (AU-ABC Category I), which allows Community College of the Air Force (CCAF) associate degree holders to enroll.
