

B.S. in Pilot Operations

The Bachelor of Science in Pilot Operations is designed for undergraduate students with an interest in aeronautical science who are already licensed pilots. The program supports preparation for roles in aviation operations and leadership and includes instruction from faculty with industry experience.

At the **Worldwide & Online Campus**, the Bachelor of Science in Pilot Operations is delivered in an online format that allows students to complete coursework remotely. The program may be completed in approximately two years, depending on prior coursework and enrollment. Students who hold a multi-engine Airline Transport Pilot (ATP) certificate or are commercial/instrument rated with additional ratings, such as multi-engine, flight dispatcher, flight engineer or jet type ratings, may transfer up to 45 credits toward the 120-credit degree. *Graduates from the Worldwide Bachelor of Science in Pilot Operations are not eligible to apply for a restricted privileges airline transport pilot (R-ATP) certificate.*
