

Any B.S. in Engineering to M.S. in Computer Science

Exceptional students enrolled in a Bachelor of Science degree program at the Daytona Beach campus can pursue the Master of Science in Computer Science (MSCS) in an accelerated format. In this option, up to nine hours of graduate coursework may be taken to fulfill undergraduate technical elective requirements and specified courses. These hours will count toward both the BS and MS degree requirements, provided that the student is enrolled in the accelerated MSCS option and receives a "B" or better in the course. Students must complete a minimum of 120 undergraduate course credits for their Bachelor of Science degree.

Students will be dropped from the program if their GPA falls below 3.0. The Bachelor of Science degree will be conferred upon completion of all bachelor's degree requirements; the Master of Science degree will be conferred upon completion of all master's degree requirements.

Students pursuing combined programs should consult MSCS Program Coordinator to identify appropriate graduate courses to be counted toward their undergraduate degree.
