

B.S. in Aviation and Aerospace Safety to M.S. in Aviation

This program allows the exceptional student to complete the Bachelor of Science in Aviation and Aerospace Safety (BSAAS) and Master of Science in Aviation (MSAV) degrees at the Daytona Beach campus.

Upon completing the undergraduate requirements, the Bachelor of Science degree in Aviation and Aerospace Safety will be conferred, and students will be enrolled in the graduate degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. If a grade of "C" or "F" is earned in any of the MSAV courses taken in lieu of the undergraduate courses in the BSAAS degree, the student will be removed from the MSAV program and may continue to complete the BSAAS degree only.

If the student chooses to leave the program before the completion of the graduate program and has acquired the minimal hours required for graduation with the undergraduate degree, any MSAV transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Program

Students enrolled in the combined option must consult their academic advisor and the MSAV program coordinator to determine appropriate course selection. Students will spend three academic years in undergraduate-level study and then, during their senior year, will be allowed to take up to three 500-level graduate MSAV courses instead of an equal number of undergraduate Open Electives and Safety Electives, and/or substitute the AVSF 320 Human Factors in Aviation undergraduate course with the ASCI 604 Human Factors in Aviation course.
