

B.S. in Aviation and Aerospace Safety to M.S. in Occupational Safety Management

This program allows the exceptional student to complete the Bachelor of Science in Aviation and Aerospace Safety (BSAAS) and Master of Science in Occupational Safety Management (MSOSM) degrees at the Daytona Beach campus.

This special program will challenge students and develop their knowledge and understanding of aerospace and occupational safety concepts while integrating their skills in aviation and aerospace applications.

Upon completing the undergraduate requirements, the Bachelor of Science degree in Aviation and Aerospace Safety will be conferred, and students will be enrolled in the graduate degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. If a grade of "C" or "F" is earned in any of the courses taken in lieu of the elective courses in the BSAAS degree, the student will be removed from the program and may continue to complete the BSAAS degree only.

If the student chooses to leave the program before the completion of the graduate program and has acquired the minimal hours required for graduation with the undergraduate, any graduate transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Program

Students enrolled in the combined option must consult their academic advisor and the MSOSM program coordinator to determine appropriate course selection. Students will choose up to three graduate-level courses to replace an equal number of Open Elective courses in the BSAAS degree.

View BSAAS requirements (<https://catalog.erau.edu/programs/undergraduate/bachelors/aviation-aerospace-safety/>)

View MSOSM requirements (<https://catalog.erau.edu/programs/graduate/masters/occupational-safety-management/>)

Combined Program Requirements

Undergraduate BSAAS Courses	113
MSOSM Transition Courses	9
Choose up to three of the following:	
SFTY 520	Occupational Health and Safety Foundations
SFTY 530	Safety, Health and Environmental Legislation, Litigation and Compliance
SFTY 550	Fire Safety Management and Disaster Response
SFTY 580	Environmental Protection for the Safety, Health and Environmental Manager
SFTY 590	Hazard Control Methods in Occupational Safety and Health
Graduate MSOSM Courses	27
Total Credits	149

Students must fulfill the required MSOSM core classes and any remaining courses from the transitional period that have not been completed.
