

B.S. in Aviation Maintenance Science to Master of Business Administration

This program allows the exceptional student to complete the Bachelor of Science in Aviation Maintenance Science (BSAMS) and Master of Business Administration (MBA) degrees at the Daytona Beach campus.

Upon completing the undergraduate requirements, the Bachelor of Science degree in Aviation Maintenance Science will be conferred, and students will be enrolled in the graduate degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. These credits will count toward the undergraduate and graduate degree requirements, provided the student maintains enrollment in the combined program and receives a "B" or better in the courses.

If the student chooses to leave the program before the completion of the MBA program and has acquired the minimal hours required for graduation with the B.S. in Aviation Maintenance Science, any MBA transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Program

Students enrolled in the combined option must consult their academic advisor and the MBA program coordinator to determine appropriate course selection. Students may choose up to two courses (six hours) from SCLM 511, MGMT 520, or ECON 523 to fulfill an equal number of upper-level open electives in the B.S. in Aviation Maintenance Science degree.

The Maintenance Management Area of Concentration must be selected as the field of study to prepare the student for this degree option. Students should review the undergraduate degree program sections for the recommended course of study and program requirements.

Students in the 2025-2026 and 2026-2027 catalogs must consult with their advisor or program coordinator due to changes in program requirements.
