

B.S. in Aviation Maintenance Science to M.S. in Aviation

This program is for exceptional students committed to continuing their education through the Master's degree. This fast-paced program allows qualifying students the opportunity to complete both the Bachelor of Science in Aviation Maintenance Science (BSAMS) degree and the Master of Science in Aviation (MSAV) in five academic years at the Daytona Beach campus.

Upon completing the undergraduate requirements, the Bachelor of Science degree in Aviation Maintenance Science will be conferred, and students will be enrolled in the graduate degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. If a grade of "C" or "F" is earned in any of the MSAV courses taken in lieu of the undergraduate courses in the BSAMS degree, the student will be removed from the MSAV program and may continue to complete the BSAMS degree only.

If the student chooses to leave the program before the completion of the MSAV program and has acquired the minimal hours required for graduation with the B.S. in Aviation Maintenance Science, any MSAV transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Program

Students enrolled in the combined option must consult their academic advisor and the MSAV program coordinator to determine appropriate course selection. Up to three 500-level graduate MSAV courses may be taken and will replace an equal number of undergraduate Area of Concentration courses or Upper-Level Open Elective courses in the BSAMS degree.

Students in the 2025-2026 and 2026-2027 catalogs must consult with their advisor or program coordinator due to changes in program requirements.
