

B.S. in Aeronautical Science to M.S. in Aviation

This program allows the exceptional student to complete the Bachelor of Science in Aeronautical Science (BSAS) and Master of Science in Aviation (MSAV) degrees at the Daytona Beach campus.

Upon completing the undergraduate requirements, the Bachelor of Science degree in Aeronautical Science will be conferred, and students will be enrolled in the graduate degree. In any graduate course taken by an undergraduate student, a grade of “B” or better must be earned. If a grade of “C” or “F” is earned in any of the graduate courses taken in lieu of the elective courses in the BSAS degree, the student will be removed from the MSAV program and may continue to complete the BSAS degree only.

If the student chooses to leave the program before the completion of the MSAV program and has acquired the minimal hours required for graduation with the B.S. in Aeronautical Science, any MSAV transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Program

Students enrolled in the combined option must consult their academic advisor and the MSAV program coordinator to determine appropriate course selection. Up to three 500-level graduate courses may be taken from the MSAV specialization and will replace an equal number of Open Elective Upper-Level courses and/or Open Electives Upper or Lower-Level courses in the BSAS degree.
