

B.S. in Computer Engineering to Master of Business Administration

This program allows the exceptional student to complete the Bachelor of Science in Computer Engineering (BSCE) and Master of Business Administration (MBA) degrees at the Daytona Beach campus.

Upon completing the undergraduate requirements, the Bachelor of Science degree in Computer Engineering will be conferred, and students will be enrolled in the graduate degree. In any graduate course taken by an undergraduate student, a grade of "B" or better must be earned. These credits will count toward the undergraduate and graduate degree requirements, provided the student maintains enrollment in the combined program and receives a "B" or better in the courses.

If the student chooses to leave the program before the completion of the MBA program and has acquired the minimal hours required for graduation with the B.S. in Computer Engineering, any MBA transition courses used to meet graduation requirements will be noted as undergraduate courses for the purpose of graduation.

Approved Courses for the Combined Program

Students enrolled in the combined option must consult their academic advisor and the MBA program coordinator to determine appropriate course selection. This program does not require any courses in Business Administration to be completed prior to application. Students will take up to six hours of SCLM 511 and MGMT 520 or ECON 523 in place of the third and/or fourth-year specified electives listed in the program.

View MBA requirements (<https://catalog.erau.edu/programs/graduate/masters/business-administration/>)

Combined Program Requirements

Undergraduate BSCE Courses	121
MBA Transition Courses	6
Choose two of the following:	
SCLM 511	Operations Research
MGMT 520	Organizational Behavior, Theory, and Applications in Aviation
ECON 523	Advanced Aviation Economics
Graduate MBA Courses	27
Total Credits	154

Students must fulfill the required MBA core classes and any remaining courses from the transitional period that have not been completed.
