

Minor in Airline Operations

This minor focuses on the multi-faceted and dynamic nature of airline operational control. Courses include instrument and commercial pilot procedures, advanced navigation, aircraft performance, air traffic control, and meteorology with practical exercise scenarios in the Airline Operations Center lab. The minor includes the courses required for the Aircraft Dispatch Certification program. Note: ASCI 434 Airline Operations Command and Control course is not required for FAA Dispatch certification. ASCI 434 is the capstone course for the minor and normally is taken last. A grade of "C" or higher is required for ASCI 221 and ASCI 321.

Some majors may not be eligible to pair with this minor. See the Minor Restrictions (<https://catalog.erau.edu/programs/undergraduate/minors/restrictions/>) list for details.
