

Minor in Cyber Intelligence and Security

The Cyber Intelligence and Security minor provides foundational knowledge of programming, the structure of the internet and core cybersecurity terminology. Upper-level coursework allows students to tailor the minor to specific areas of interest within the field. Students should be aware that many courses have prerequisites and/or corequisites, and some courses are offered only during the fall or spring semester

Some majors may not be eligible to pair with this minor. See the Minor Restrictions (<https://catalog.erau.edu/programs/undergraduate/minors/restrictions/>) list for details.
