

Minor in Homeland Security

The Minor in Homeland Security equips students with specialized knowledge and skills essential for protecting the nation's transportation infrastructure. It focuses on planning for, responding to, and managing emergencies related to acts of terrorism, as well as natural and man-made disasters. This minor is especially beneficial for students pursuing majors in safety, aeronautical science, airport management, communication, human factors, aeronautics, business, or interdisciplinary studies. Upon completion of this minor, students will be adept in assessing security risks, developing strategic responses, and understanding the complexities of homeland security operations.

Some majors may not be eligible to pair with this minor. See the Minor Restrictions (<https://catalog.erau.edu/programs/undergraduate/minors/restrictions/>) list for details.
