

Minor in Intelligence

The Intelligence minor provides students with a foundational understanding of intelligence analysis, national security and global threats. Students develop critical thinking and analytical skills while examining intelligence systems, geopolitical dynamics and emerging security challenges. This minor complements a range of majors by preparing students for careers in intelligence, defense, government and related fields.

Some majors may not be eligible to pair with this minor. See the Minor Restrictions (<https://catalog.erau.edu/programs/undergraduate/minors/restrictions/>) list for details.
