

Minor in Military Science

The Minor in Military Science program is structured to provide students with foundational knowledge in military practices, history, homeland security principles, and management basics. This foundational coursework lays the groundwork for deeper exploration through elective subjects within the minor, offering a broad perspective that is both comprehensive and adaptable to a range of academic and career interests.

Some majors may not be eligible to pair with this minor. See the Minor Restrictions (<https://catalog.erau.edu/programs/undergraduate/minors/restrictions/>) list for details.
