

Minor in Security and Intelligence

In an era where security and intelligence are of paramount importance, the Minor in Security and Intelligence is timely and relevant. This program is designed for students aiming to become professionals in aviation security, commercial security, homeland security, national security, and intelligence communities. It prepares students for the challenges of protecting assets in the face of evolving security threats in both the public and private sectors.

The Minor in Security and Intelligence provides students with a comprehensive understanding of the intelligence cycle, including practical applications valuable across various professions. Students will learn to analyze, interpret, and evaluate intelligence information, equipping them with skills critical for decision-making in security roles. This minor is also beneficial for those in non-security professions who may assume security responsibilities or oversee security operations as part of their duties.

Some majors may not be eligible to pair with this minor. See the Minor Restrictions (<https://catalog.erau.edu/programs/undergraduate/minors/restrictions/>) list for details.
