

B.S. in Homeland Security

Students will:

- Deliver professional presentations and communications based on scholarly research they conduct.
- Engage in all phases of the intelligence cycle, including techniques, strategies, and counter-intelligence concepts.
- Identify information security threats, cybersecurity challenges, and countermeasures.
- Demonstrate mastery of homeland security knowledge and tools.
- Recognize concepts of ethics and professionalism within the homeland security enterprise.
- Interpret the legal and policy structure of the homeland security and intelligence enterprise.
- Evaluate exercises of their design applicable to the disciplines of homeland security.
- Demonstrate knowledge of contemporary or emergent threats, including natural, man-made, and technological hazards.
- Define terrorism, its origins, ideologies, and goals.
- Assess U.S. critical infrastructures using risk-based methodologies and resiliency concepts.
- Apply risk management and analysis principles to homeland security and intelligence issues.
- Analyze environmental hazards and characterize their relationship to U.S. homeland/national security.
- Analyze elements of strategic planning and decision making.
