

# B.S. in Safety Management

---

The Bachelor of Science in Safety Management (BSSM) program is designed to provide students with the knowledge and skills to operate as competent leaders, managers, and practitioners in safety management. Students will develop technical understanding and expertise and a practical and analytical approach to problem solving that will allow them to address industry-related safety challenges in both the public and private sectors.

This degree program comprises core safety and emergency management courses with enough elective hours for students to earn as many as two minors to leverage professional development opportunities and study additional areas of interest.

The Worldwide Campus is appropriately positioned to offer the Bachelor of Science in Safety Management program. It has expertise in multi-modal curriculum delivery and experience delivering graduate programs to a widely dispersed student population.

**For students wanting to pursue a master's degree, the BSSM-MSOSM 4+1 program is now available to all BSSM program students.**

- Upon acceptance, students spend three academic years in undergraduate-level study. Then, during their senior year, they will take up to three graduate-level courses that will meet the undergraduate 400-level elective and graduate program core requirements (GPA restrictions apply).
- Upon completing the BSSM requirements, students will be enrolled in graduate school and can complete their degree in one year. (GPA restrictions apply).
