

Master of Aviation Maintenance

The Master of Aviation Maintenance (MAM) degree program is designed to provide students with the knowledge and skills to function as competent supervisors and managers of aviation maintenance programs in a dynamic and highly complex aviation global industry.

Students will develop a practical and analytical approach to problem-solving that will meet the challenges of managing and leading an aviation maintenance organization. The objective of the MAM is to provide the skills necessary for students to become influential professionals in the aviation maintenance industry. Within this context, the main goals of the MAM program are to provide students the opportunity to acquire the knowledge, skills, and abilities central to aviation maintenance and related industries. The program will provide the needed academic tools for students to become effective professionals, leaders, team members, managers, and undertake lifelong learning for continuing professional development.
