

A.S. in Technical Management

In today's workplace, a college degree has never been more important. Employers see it as a demonstration of knowledge, motivation, and persistence — qualities that will set you above and apart from the pack. The Associate in Science in Technical Management program will appeal to your background, interests, and talents and give you a competitive edge in your career, too.

The Associate in Science in Technical Management curriculum was developed to give students the skills to marshal the resources of any organization toward its goals. Over the course of this program, students learn to organize, plan, staff, and coordinate physical assets as well as personnel.

This program is accredited by the Association of Collegiate Business Schools and Programs (ACBSP).
