

# B.S. in Project Management

---

From developing transformative technologies to launching bold new products, companies in every industry need projects delivered on time and on budget with minimal friction. Project managers have the opportunity to work on leading-edge ventures in fields of their choice. And the need for the expertise of these project leaders is only growing.

As one of the few undergraduate degree programs in this dynamic field, the Embry-Riddle Bachelor of Science in Project Management (BSPM) will help you master the skills to lead the new projects and strategic initiatives that keep companies ahead of the curve. The project management curriculum was developed entirely by certified PMPs®, industry leaders who possess the recognized global standard for project management knowledge and experience issued by the Project Management Institute® (PMI) – the worldwide leader in the development of standards for the dynamic profession of Project Management.

BSPM graduates will be equipped to lead, manage, and execute on vital projects required by companies today and in the future. They will also be prepared to pursue certification or continue on with higher education.

The Bachelor of Science in Project Management is accredited by the PMI Global Accreditation Center for Project Management Education Programs (GAC). Degree programs that achieve GAC accreditation must demonstrate and meet the GAC's rigorous global standards of accreditation, which include an assessment of each program's objectives and outcomes, faculty and student evaluations, onsite and online resources, annual self-evaluation, and proof of continuous improvements in the area of project management education. GAC accreditation ensures the quality of academic degree programs and their graduates in order to meet the standards of the rapidly growing field of project management.
