

B.S. in Technical Management

Students will:

- Employ supervisory and management skills needed to effectively lead and support others within a team environment across business functions.
- Apply a research skillset to solve business problems and communicate the results effectively.
- Use established methodologies and standards to critically evaluate business functions and processes, identify needs, and structure business approaches.
- Know key principles of business and management disciplines and their business applications, and the possible interrelationships to technical management practices especially in the field of aviation and aerospace.
- Solve problems related to the specialty areas of aviation management, business cybersecurity, human resources management, or leadership and their interrelationships to business and technical management practices.
